To Whom It May Concern:

As leader of the Intelligent and Semantic systems research team inside EADS corporate research center, I highly recommend THIBAUD COMTE-PALASSOE as a candidate for employment or PhD. Myself as well as my team members highly appreciated the rigorous and professional work that THIBAUD realized during his six months internship in my team.

The best evidence of our satisfaction is that I proposed to Thibaud several opportunities to join us as PhD candidate in France and as research engineering Singapore. Unfortunately for us and maybe fortunately for you THIBAUD had its own project for moving to CANADA.

On top of excellent technical and organization skills, THIBAUD was very quick to integrate the daily life of the team and was successful in building a lot of connection beyond the scope of my team. It has been a real pleasure to work with him.

If you have any further questions with regard to his background or qualifications, please do not hesitate to call me.

Sincerely,

Romarc Redon

EADS Innovation Works
